New padel tennis plant for Seeboden on Lake Millstatt

Commissioned by Lakeside Padel FlexCo, A. Niedermühlbichler Baugesellschaft m.b.H. constructed a modern padel tennis plant in Seeboden on Lake Millstatt, thereby adding a new attraction to the Carinthian municipality's range of sports and leisure activities.

In just a seven-week construction period, two modern padel courts were built, each with a playing area of 200 m². In addition to the construction of the courts, the scope of work in building and civil engineering also included the necessary infrastructure, (artificial) lighting and fencing.

In addition, the project team carried out the foundation work for the service and occupied zone. Today, players and visitors alike have access to changing rooms, toilet facilities and a snack vending machine there. The plant thus provides the ideal infrastructure for sporting events and shared leisure activities.

This new sporting facility specifically complements the existing infrastructure in Seeboden on Lake Millstatt. The padel tennis plant, which can be used all year round, creates additional opportunities for active leisure pursuits whilst also enhancing the area's appeal for both locals and visitors.
