Foundation for the future.

In the course of the restoration and surface renovation, the road surfaces were widened by the addition of a hard shoulder. Panels in the median strip were replaced by a barrier. With this widening work, the viaduct is ready for a possible upgrade to six lanes in the coming years.

Impressions

Image notes

1

Noise protection included.

During this renovation, PORR mounted Plexiglas sound-protection barriers on the guide walls.

2

Renovation without obstructions.

Four lanes of the bridge remained open throughout the entire construction period.

3

Wide range.

The 366m-long, but originally only 23.3m-wide, Aabachtal viaduct was widened by 5 metres.
