Historical restoration measures.

A new chamber theatre was built in the Small Scene building, which in future will offer space for 63 spectators. Not only did we take care of the acting room, but also of the corresponding adjoining rooms, a new sound engineer's cabin, a cleaning room, rooms for the actors and actresses as well as sanitary facilities and changing rooms. At the same time, we built a bar with a capacity of 24 seats and carried out small construction measures in the first basement, second upper floor and at the roof truss, renovated the street facade and replaced windows.
