Sporting construction performance for the EURO 2008.

Phase 2: Event preparation (construction time: September 2007 to March 2008).

Immediately prior to the EURO 2008, the entire temporary event areas and rooms around the stadium needed to be installed. For this purpose, 30,000m² of adjacent grassland were converted to parking lots, safety zones as well as areas for the public safety organisations, press and the media as well as for VIP hosting services. Additionally, the field was completely renewed for the Eurocup matches to be held and first-level support during the matches was provided.

Phase 3: Dismantling after the EURO 2008 (construction time: July 2008 to April 2009).

Between July 2008 and April 2009, the expanded stadium was returned to its original capacity in a mere nine months. In the process, certain upgrades installed for the EURO 2008 were adapted and kept for future use.

Impressions

Image notes

1

Tivoli Stadium Innsbruck expansion.

For the EURO 2008, the stadium's capacity was doubled to 30,000 spectators.
