[Project report online](#)

www.porr-group.com

Modern building on former industrial site.

On the upper floors, high-quality living space with 178 flats and two studios was created on around 9,000 m². The concept of the studios as well as the 2.5 and 3.5 room flats is based on an open floor plan design according to the idea of living through. The basement floors are equipped with bicycle shelters and car parking spaces.

The project meets high sustainability standards and will be certified according to the Minergie standard.

Impressions

Image notes

1

Modern residential and commercial building in an excellent developed location.

The robustness and simplicity of the clinker brick facade as well as the horizontal formats of the window subdivisions are reminiscent of earlier industrial use.

2

High-quality living space.

The flats convince with a lot of charm and quality of life.
