Runtime	10.2017 - 11.2017
Principal	Road and Motorway Directorate of the Czech Republic (ŘSD ČR)

[Project report online](#)

www.porr-group.com

Laying concrete 24/7.

Services provided by ÖBA included the construction of the 90,000m² concrete slab, including the exposed aggregate concrete structure and all the jointwork. Due to the very tight construction schedule, the works were carried out around the clock, seven days a week. Despite unfavourable weather conditions, the project was handed over to the client on time and with no defects. This was thanks in no small part to the team's tireless dedication and great wealth of experience.

Impressions

Image notes

1

On the road to Brno.

Our concrete slab paving train was in operation around the clock on the D2 in order to complete the new road surface as quickly as possible.

2

A reliable road surface – come ice or snow.

OBATECH s.r.o. replaced a total of 90,000m² of concrete slab on the Czech D2.
