PORR

Rebuilding foundations with the pilgrim step method.

Our specialists invested a great deal of effort within a short construction period and in extremely limited space. They were all the happier to complete the project successfully in October 2018. The new basement floor of the well-known sports and luxury hotel now houses storage areas, a plant room, a boiler room and a wine cellar.

Impressions

Image notes

1

The hotel expands into the depths.

A fourth basement floor was created in extremely limited space.

2

More room in a confined space.

Photo: hotel with stone and timber facade and balconies; a gondola cable car approaches from left; in the background, mountains and a cloudy sky
