Another construction stage is completed.

Impressions

Image notes

1

Part of the renovated section.

The newly constructed retaining wall and the restrained anchors serve to protect the winding road.

2

Mountain-side widened, curvy road section.

After demolition of the old retaining wall, the road was widened, secured by slope stabilisation with self-drilling anchors and shotcrete, and then rebuilt.

Do you have questions about the project or would you like to learn more? Feel free to contact us for further information.
