K27 Bristenstrasse - stage 2024, natural hazard measures section Bristen - St. Antoni

Impressions

Image notes

1

Rockfall protection system 500 KJ

Installation of a 500 KJ rockfall protection system. Six such systems are being built. In the picture, the support poles have already been moved and the net will then be installed.

2

Create access points

To ensure that the work can be carried out in rough terrain, safe access points are required, which are created using scaffolding tubes.

3

Working in steep terrain

Working platforms are moved by helicopter so that the anchors and piles can be installed in the steep terrain. The platforms serve as a storage space for materials and inventory.

Do you have questions about the project or would you like to learn more? Feel free to contact us for further information.
