Room for creativity: Construction of the KinderKunstLabor

The facade was designed as a rear-ventilated curtain wall with suspended glulam louvres, while the glass surfaces were designed as a timber mullion and transom façade. Two thirds of the floor area is covered with terrazzo screed.

The construction of the KinderKunstLabor started at the end of 2022 and the official opening took place at the end of June 2024. PORR is proud to have realised this inspiring project and is looking forward to the many creative ideas that will emerge in this pioneering environment. With our expertise and commitment to sustainable construction, we are helping to create innovative and future-proof spaces.

Fancy a look inside? You can see more of KinderKunstLabor in our video:
