Best connections in every direction.

The joint area presented particular challenges due to the need for special structures. PORR was able to deploy its expertise and innovative approach effectively, and so complete this challenge successfully. In addition to building the slab track system, the project also included execution planning and obtaining the required official permissions.

Impressions

Image notes

1

Lehrter Station Berlin Tunnel

Underground railway tracks at Lehrter Station

2

Tunnel Lehrter Station Berlin

The system, developed together with ÖBB, provides for a safe and comfortable journey

3

Lehrter Station Berlin roof

Under the Austria Slab Track system the tracks are mounted on track base plates made of concrete without any ballast.
