Comprehensive civil engineering works at LKH Feldkirch

as a tight schedule had to be adhered to and close cooperation with other companies and trades was required. Ensuring access to the hospital for emergencies was always a particular priority. Despite these challenges, the project was successfully completed.

Impressions

Image notes

1

Easy access for life-saving emergency vehicles.

The open entrance area, including the rescue entrance, was a top priority during the construction work.

2

Urban infrastructure with a modern design.

An urban design was also essential for the construction of the simple benches and the wide bus turnaround area.

3

Accessibility and mobility.

The wide pavement with green space and the modern bicycle stands offer space for everyone.
