

Lohmann & Rauscher – Production plant extension

Data and facts

Company	PORR a.s.
Type	Industrial construction
Runtime	07.2015 - 03.2016
Principal	Lohmann & Rauscher s.r.o.

[Project report online](#)

www.porr-group.com

An ultra-modern production site for medical items.

The production hall is connected to two pre-existing warehouses: the component storage unit and high-bay warehouse. The component storage unit measures 4m in height and is used to store parts intended for use in the production of completed sets. The high-bay storage area is 11m high and is predominately used for packaging materials and semi-finished products such as cotton fleece and packaging film. The high-bay storage warehouse has a capacity of 3,910 pallets on five levels. The contract also included the reconstruction of staff rooms. All construction works were carried out alongside ongoing production.

The entire roof system was renovated as part of this project, including the thermal insulation and moisture sealing as well as all plumbing elements. ROCKWOOL mineral wool was used for thermal insulation and sealing foil was installed to protect against humidity.

Impressions

Image notes

1

Expansion of the Lohmann & Rauscher production facility.

The plant expansion enabled increased production of medical articles.

2

Spotlessly clean inner workings.

High standards of cleanliness were implemented in the production areas.
