

ÖBB training workshop

Data and facts

Company	PORR Bau GmbH
Type	Public buildings
Runtime	11.2012 - 10.2013
Principal	ÖBB Infrastruktur AG

[Project report online](#)

www.porr-group.com

High-quality training locations for young trainee employees.

This was achieved by consciously placed openings, different colours and different types of surface structures with simple means: The ground floor with its dark brown, rough-plastered façade forms the massive base for the floor block floating above, retained in brilliant white. Its plastering has, according to its different functions, a finer structure from that of the assembly hall also retained in white. The heating and hot water system – specifically designed as CO₂ neutral – of the training workshop comes from a solar plant on the roof with a gross collector area of around 150m², whose energy is stored in the floor panel and the intermediate floor of the building.
