# The two towers.

The quality of the offices and the flexible room layout are absolutely unique. The technical equipment of the standard rental spaces meets all the relevant requirements. Some of the world's top IT companies requested customised finishes. The large windows ensure plenty of natural light throughout the whole complex. This also applies to the lounge areas, of which one is located on each floor. The ground floor features a canteen, a café and terrace, as well as several shops. One of the basic requirements was to create sufficient parking spaces. This task was solved by creating parking facilities in second and first basement as well as exterior parking on the ground floor. And also cyclists are well catered for: they have showers and changing rooms at their disposal.

The environmental friendly construction of one of Bucharest's most complex office buildings was awarded an LEED Platinum certificate. The first tenants were welcomed in July 2018, only two-and-a-half years after signing the contract. Until today, the two towers set the tone for future office projects.

## Impressions

## Image notes

1

Shaping the skyline.

The Orhideea Towers both provide unique views of Bucharest and also serve as a tourist attraction themselves.

2

In harmony with nature.

The Orhideea Towers score points with an innovative energy concept. The project was awarded with a LEED Platinum certificate for environmental friendly construction.
