A multi-functional office building with LEED Platinum certification.

The newly-constructed office building blends harmoniously into the historic city district and is well-matched to adjacent buildings, including the historic courthouse and municipal offices. This is in large part due to the ceramic slabs of the façade cladding, which resemble sandstone. The ground floor and first floor, as well as sections of the second floor, currently house the offices of a bank. The third to the slightly set-back sixth floors contain additional, flexibly designed office spaces.
