PORR

In action for the fire brigade.

In the course of this project, THORN Abwassertechnik relied on pipe lining up to DN 200 and installation methods with hot water curing. After these first steps, a sewer milling robot took over the opening of branches. The THORN team relied on the proven RATHOSAN full filling method for the rehabilitation of underground pipes.

Impressions

Image notes

1

Liquid rehabilitation in the fire station.

For the voluntary fire brigade in Eching, THORN relied on pipe lining and installation methods with hot water curing.

2

Mission accomplished.

The fire station in Eching shines in new splendour after the extension, conversion, and rehabilitation of the sewage pipes.
