A new bridge overnight.

Just one night saw the complete "showdown" for this one-year project. Both 170 tonne elements were individually moved by one of the largest tracked cranes in Switzerland, positioned with millimetric precision, and joined with quick-setting concrete. In May 2017, this bridge project was rated first-class by the client, Swiss Federal Railways.

Impressions

Image notes

1

Night-time showdown.

To position the 170 tonne bridge slabs, the PORR team made use of one of the largest tracked cranes in Switzerland.

2

New day, new bridge.

Together with client Swiss Federal Railways, PORR reflects on a spectacular construction project.

Millimetric precision, powered by PORR

In a single night, both 170 tonne bridge sections were positioned and connected, for the most part, without interrupting railway traffic.
