Good renovation all round.

Along with these construction measures, grooved tramway rails and switch points were installed in the concrete slab. The surface layer of the tram line comprises a total of 912 L-shaped pre-fabricated parts, each weighing 0.5t, and the pavement was realised using paving stones and melted asphalt. The asphalt concrete base layer measures between 40 and 60mm thick.

Impressions

Image notes

1

All-inclusive renovation.

This project included the complete renewal of the tram lines and tram stops.

2

Critical point.

The Flora tramway intersection is an important traffic junction. Accordingly, the renovation works were of particularly high significance.

3

High-quality execution.

A mosaic pavement was constructed in the course of the tram stops' renovation.
