A Baroque castle restored to its former glory.

PORR's work package on this project comprised uncovering and restoring historic stucco ceilings, as well as building a new castle cafe, bathroom facilities made of glass partitions and fair-faced concrete dividing walls, converting the former dairy, and restoring the facade with lime putty – at 10,000m², this happened to be Austria's most comprehensive restoration with lime putty once the works were completed.

Another special feature of the project lay in restoring the Baroque fountains. The Neptune and Naiad fountains, the small cascades and the castle's fountains with strong jets now all have water running through them and transport the castle's visitors back to the property's heyday. The two orangeries and the castle gardens, which the PORR teams also restored to their original Baroque state, also contribute to the overall authenticity.

Impressions

Image notes

1

Revitalising Schloss Hof

The exceptionally well-renovated castle is a popular destination
