Type	Hydraulic engineering & harbours, Road construction
Runtime	09.2013 - 04.2017
Principal	Canton Lucerne, Traffic and Infrastructure Construction

[Project report online](#)

www.porr-group.com

Flood control measures and new traffic system.

At the same time, finishing works were completed on the corresponding stretch of the Rothenstrasse: the bus lane was extended, new pedestrian crossings installed and the road surfaces (including sewage systems, cabling, finishing and surfaces) renovated.

During all activities, attention had to be paid to the hourly changing water levels of the Kleine Emme.

Impressions

Image notes

1

New bank for the Kleine Emme.

Prior to completion of the extensive renovation and rehabilitation project, the Seetalplatz traffic intersection was in danger of flooding.

2

Step by step to successful project completion

Approval for the new underpass for road traffic marked the completion of an important intermediate step.

Work in progress.

Tireless efforts by PORR staff members continue
- piece by piece, section by section.
