Over their heads.

On the first floor an inner garden including a pond and waterfall was created, with the water falling down to the ground floor. Our colleagues were also able to demonstrate all their skills in the redesign of a new atrium leading across both floors. This required the demolition of existing ceilings in order to be able to install a steel construction weighing several tons. These construction measures were carried out during operating hours, so to speak above the heads of the visitors.

Impressions

Image notes

1

Open and bright.

The open and bright design of the mall creates an inviting atmosphere and provides a good view of individual points of sale.

2

Shopping experience on all levels.

The converted shopping centre offers the ideal environment for relaxed shopping.

3

Concentrated radiance.

Thanks to the illuminated logos of the shopping centre and the stores, the façade also makes a good impression at night.
