Runtime	11.2012 - 01.2016
Principal	AQUATIM S.A.

[Project report online](#)

www.porr-group.com

New pipes for Timișoara.

Furthermore, the work on the water supply system comprised around 225 household connections as well as the construction of 40 large valve chambers.

Most of the pipelaying was executed in an open trench. However, about 190m of sewer pipes and 2,000m of water pipes had to be installed trenchless and were executed through horizontal drilling.

The project was successfully completed in January 2016.

Impressions

Image notes

1

Rehabilitation and extension.

Most of the installation activities were executed in an open trench.

2

New sewerage and water supply system.

The rehabilitation and extension was executed by PORR together with other construction companies.
