# A new connection across the Neckar valley

---

Watch our project video\* :

- [PORR Germany . Viaduct Horb, pile foundation auf Vimeo](#)
- 

The bridge has five piers, of which the three central piers are designed as pylons that extend above the carriageway in a V-shape, with each of the adjacent spans braced with stay cables. The foundation of the piers will primarily be constructed using large bored piles with a diameter of 1.5 metres and a length of up to 40 metres. The total value of the contract is around €113 million. Work on the "Neckar Valley Viaduct" will start in 2023. The bridge is scheduled to open for traffic in 2026.

## Animated overview

[This Youtube video](#) by Karlsruhe Regional Council gives an impressive, animated overview of the entire project.
