Wien Museum in new splendour

while the "Haerdtl" windows were faithfully reproduced to meet contemporary building physics standards. A special feature is the entrance pavilion, which is fitted with electrochromic glass elements and stabilised by 9.20 m high glass swords.

Scope of services:

- 1,200 m² PR façade (joint storey)
- 300 m² PR façade (2-storey)
- 750 m² PR perforated elements (so-called Haerdtl windows)
- 450 m² all-glass façade (pavilion)
- 180 linear metres of walk-on glazing
- Refurbishment and customisation of existing windows

Impressions

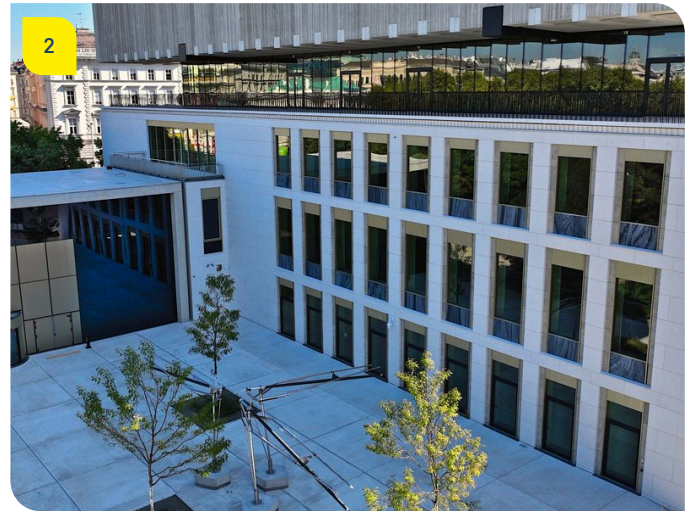

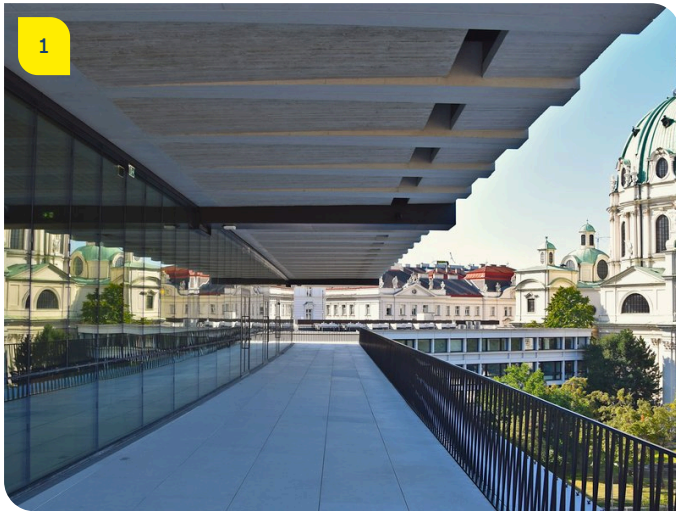

Image notes

1

Spacious terrace.

The inviting terrace not only impresses with a beautiful view, but also reflects the historic Karlskirche church in its façade.

3

Fusion of old and new.

The façade was revitalised and at the same time modernised to meet today's requirements without losing the original charm of the "Haerdtl" windows.

2

Extensive façade work.

The challenging project comprised demolition, new construction and revitalisation under monument protection requirements.
