Three houses in the Vorach

Dworzak-Grabher, which not only contributes to the aesthetic enhancement, but also offers positive environmental effects such as better thermal insulation and rainwater retention. A 94 kWp photovoltaic system provides environmentally friendly energy generation. Heating and hot water are provided by geothermal energy. Waste is disposed of using an efficient and space-saving underground system. A special feature of this project is the high proportion of in-house labour by companies from the PORR Group, which carried out 60% of the work. This guarantees the highest quality and efficiency during the entire construction phase.
